Abstrak

[ABSTRAK

Penelitian ini bertujuan untuk menganalisis peran pengembangan keuangan terhadap pertumbuhan ekonomi menggunakan kasus Indonesia dan data yang diperoleh dari Bank Indonesia dan menggunakan data kuartalan dari 2005-2014

Dalam tulisan ini akan ditemukan pengembangan keuangan lebih terpengaruh dibandingkan dengan pembangunan non-keuangan. Dengan menggunakan STATA dan melalui beberapa metode menggunakan VAR (Vector Autoregressive) akan mengukur peran pengembangan keuangan. Pengembangan keuangan terdiri dari M1, tingkat inflasi, dan nilai tukar. Namun, pengembangan non-keuangan terdiri dari belanja pemerintah, belanja konsumen dan total ekspor.

Penelitian ini bertujuan untuk menganalisis peran pengembangan keuangan terhadap pertumbuhan ekonomi menggunakan kasus Indonesia dan data yang diperoleh dari Bank Indonesia dan menggunakan data kuartalan dari 2005-2014

ABSTRACT

This study aims to analyze the role of financial development to the economic growth using case of Indonesia and the data was obtained from Bank Indonesia and used quarterly data from 2005-2014

In this paper will found the financial development is more affected compare to the non-financial development. By using STATA and through some method using VAR (Vector Autoregressive) it will measure the role of financial development. Financial Development consists of M1, Inflation rate, and exchange rate. However, the non-financial development consists of government spending, consumer spending and total exports.;This study aims to analyze the role of financial development to the economic growth using case of Indonesia and the data was obtained from Bank Indonesia and used quarterly data from 2005-2014
