Abstrak

Skripsi ini menganalisa tentang Keselamatan dan Kesehatan Kerja (K3) di industri percetakan khususnya di Gramedia Printing Group melalui yuridis normatif di dukung data empiris. Tipologi penelitian ini bersifat penelitian deskriptif analitis, dengan menggunakan pendekatan kualitatif pengolahan data. Industri percetakan beberapa tahun terakhir ini menarik di samping terus berkembang juga masih banyak menyerap tenaga kerja. Tujuan penelitian ini untuk mengetahui implementasi industri percetakan yang berkembang dengan tingkat relatif menengah dalam menerapkan K3.

Berdasarkan penelitian diketahui bahwa Gramedia Printing Group telah menerapkan peraturan dari umum sampai khusus di bidang percetakan. Namun belum sepenuhnya lengkap karena audit Sistem Manajemen Keselamatan dan Kesehatan Kerja (SMK3) belum dilakukan. Untuk menerapkan peraturan secara sempurna relatif rumit, namun pihak perusahaan tetap akan memenuhi.

This thesis analyzes Occupational Safety and Health in printing industry, which in this case is Gramedia Printing Group. Normative juridical research is used, supported by empirical data literature. Typology of this research is a descriptive analytic research, using qualitative approach of data processing. During the last few years, printing industry is growing quite significantly and employs significant number of employees. The objective of this research is to observe the implementation of K3 in printing industry.

Based on the research, it is clear that Gramedia Printing Group has put into practice general to specific regulations in the organization. However, the implementation has not been fully completed yet due to the audit of SMK3 has not been conducted. Implementing all the regulations is not an easy task, however Gramedia Printing Group will and is still working on applying all the regulations.
