ABSTRAK
Industri farmasi sebagai produsen produk obat memiliki peran besar dalam peningkatan upaya kesehatan yaitu melalui pengadaan obat-obatan. Industri farmasi memproduksi obat dengan berpedoman pada cara pembuatan obat yang baik (CPOB). Industri farmasi harus memiliki minimal tiga orang apoteker sebagai penanggungjawab masing-masing pada bidang pemastian mutu, produksi, dan pengawasan mutu. Tujuan praktik kerja profesi (PKP) ini supaya mahasiswa apoteker memiliki wawasan, pengetahuan, keterampilan, dan pengalaman praktis untuk melakukan pekerjaan kefarmasian di industri farmasi dan paham penerapan CPOB. Mahasiswa apoteker di tempatkan di bagian quality assurance (QA) dan melakukan validasi metode pembersihan. Dari PKP yang dilakukan, mahasiswa PKP mendapat pengetahuan pekerjaan kefarmasian di industri farmasi, memperoleh keterampilan dalam melakukan validasi pembersihan alat, dan lebih memahami penerapan aspek-aspek CPOB di industri farmasi.

ABSTRACT
The pharmaceutical industry as a manufacturer of medicinal products have a major role in improving health efforts through drugs production. The pharmaceutical industry produces drugs by referring to good manufacturing product (GMP). The pharmaceutical industry must have at least three pharmacists as a responsible in quality assurance, production and quality control. The purpose of this internship programme are to get knowledge, skills, and practical experience in the pharmaceutical industry and to understand the application of GMP. Student was placed on the quality assurance (QA) and do cleaning validation. From the internship, students gain knowledge of pharmaceutical jobs in the pharmaceutical industry, acquire skills in performing cleaning validation tools, and better understand the application of aspects of GMP in the pharmaceutical industry.;The pharmaceutical industry as a manufacturer of medicinal products have a major role in improving health efforts through drugs production.
