

Analisis Keragaman Genetik Acremonium yang Berasosiasi dengan Tanaman Gaharu menggunakan Teknik Random Amplified Polymorphic DNA (RAPD)

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20425014&lokasi=lokal>

Abstrak

Agarwood or gaharu is a plant that has a high economic value in Asia, due to its use for production of incense and traditional medicines. The agarwood formation occurs in the trunk and roots of trees that have been infected by a fungus, such as acremonium spp ...
