

Black hole astrophysics : the engine paradigm

Meier, David L., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20425015&lokasi=lokal>

Abstrak

This book begins by reviewing quasars, microquasars, and gamma-ray bursts and shows why black holes are responsible for them. It describes simple, isolated black holes, adding rotation, accretion, radiation and magnetic fields, to show how these objects work.
