

Standardisasi Bahasa Sasak dan Problem Pembelajarannya

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20425355&lokasi=lokal>

Abstrak

Sasak language, as classified by mahsun, has four dialects namely dialect a-a, dialect a-a. Each dialects consists of some subdialects. Each dialect varies structurally; that is, in term of its phonological system, morphological system and syntactic system. In a formal discussion on standardization of Bahasa sasak held at kantor bahasa Provinsi NTB in 2009, it is agreed that dialect a-a considered to be standard dialect of bahasa sasak. Thus, this study is aimed at describing some possible difficulties of learning bahasa sasak in the level of phonology, morphology and syntax. This study merely reveals some comparison examples between dialect a-a dan dialect a-a
