

Eta Carinae and the supernova impostors

Davidson, Kris, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20425379&lokasi=lokal>

Abstrak

In this book the editors and contributing authors review its remarkable history, physical state of the star and its ejecta, and its continuing instability. Chapters also include its relation to other massive, unstable stars, the massive star progenitors of supernovae, and the "first" stars in the universe.
