Abstrak

Blogs and tweets, texting and friending : social media and online professionalism in health care summarizes the most common mistakes, and their legal and ethical ramifications, made in social media by busy health care professionals. It gives best practices for using social media while maintaining online professionalism. The book goes on to identify categories of caution, from confidentiality of patient information and maintaining the professional's privacy to general netiquette in tweeting, texting, blogging, and friending. And it guides you in setting up a faculty page (or choosing not to) and managing your online footprint. The connected generation regularly uses social media, including health care professionals, but what happens when a patient wants to friend you? Or when you've already posted a rant on a patient that gets viewed by others? What information may already be floating on the Internet that a patient may find about you in a Google search and that might impact your therapeutic relationship?
