Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20427030&lokasi=lokal>

Abstrak

Identification of neural markers accompanying memory is a fresh and novel volume of memory study, providing up-to-date and comprehensive information for both students and researchers focused on the identification of neural markers accompanying memory. Contributions by experts in specific areas of memory study provide background on and definitions of memory, memory alterations, and the brain areas involved in memory and its related processes, such as consolidation, retrieval, forgetting, amnesia, and antiamnesiac effects. With coverage of the principal neurotransmitters related to memory, brain disorders presenting memory alterations, and available treatments, and with discussion of neural markers as new targets for the treatment of memory alterations, Identification of neural markers accompanying memory is a necessary and timely work for researchers in this growing field.
