Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20429844&lokasi=lokal>

Abstrak

Skripsi ini mengungkapkan elemen-elemen interior di koridor dan ramp mall yang belum ramah anak, yaitu memberikan affordance negatif sehingga berpotensi membahayakan. Penelitian dilakukan dengan menganalisis kesesuaian rancangan koridor dan ramp mall dengan standar aturan dan teori yang ada, menganalisis perilaku anak di koridor dan ramp mall yang berpotensi bahaya melalui observasi dan wawancara, dan merumuskan elemen apa saja yang berpotensi membahayakan. Hasil penelitian memberikan rekomendasi desain pada elemen arsitektur dan interior.

<hr><i>This study reveals interior elements in mall corridors and ramp which are not children friendly, for giving negative affordances and posing potential harm. The study was done by analyzing whether the mall corridor and ramp design meets the standard on guideline and theory, analyzing through observation and parents interview on child behaviors which potentially lead to accident in mall corridor and ramp, and finally concluding which elements pose potential harm. The result of this study gives guideline recommendation on the design of floor patterns, railing, steep of ramp, glass-made boundary, electrical installation, store window, bazaar/exhibition display, decorative object, and mini trains for children.</i>
