Abstrak

ABSTRAK

Guna membangun hubungan dengan pasangan yang bertahan lama melalui pernikahan, dewasa muda Indonesia perlu memiliki kesiapan menikah. Secara teoritis, terdapat hubungan antara agama khususnya religiusitas dan kesiapan menikah. Penelitian ini dilakukan untuk mengetahui hubungan antara religiusitas Islam dan kesiapan menikah pada dewasa muda. Partisipan penelitian ini adalah 566 dewasa muda muslim berusia 20-30 tahun dan belum menikah se-Indonesia. Pengambilan data dilakukan menggunakan kuesioner online. Alat ukur yang digunakan adalah The Revised Muslim Religiosity-Personality Inventory (R-MRPI) (untuk mengukur religiusitas Islam) dan Adaptasi Alat Ukur Kesiapan Perkawinan California Marriage Readiness Evaluation (CMRE) (untuk mengukur kesiapan menikah). Hasil penelitian menunjukkan terdapat hubungan positif signifikan antara religiusitas Islam dan kesiapan menikah pada dewasa muda, $r=+.650$, $N=566$, $p<0,01$. Artinya semakin tinggi religiusitas Islam seseorang maka semakin tinggi kesiapan menikahnya.

ABSTRAK

In order to build the relationship with romantic partner which lasts forever through marriage, young adults in Indonesia need readiness for marriage. Theoretically, there is relationship between religion especially religiosity and readiness for marriage. This study examined the relationship between Islamic religiosity and readiness for marriage among young adults. Participants of this study were 566 Moslem young adults in the age range of 20 to 30 years old and have not married yet from Indonesia. This study used online questionnaire method to gather the data. The instruments of this study were The Revised Muslim Religiosity-Personality Inventory (R-MRPI) (to measure Islamic religiosity) and Adaptasi Alat Ukur Kesiapan Perkawinan California Marriage Readiness Evaluation (CMRE) (to measure readiness for marriage). The result showed that there is a positive significant relationship between Islamic religiosity and readiness for marriage among young adults, $r=+.650$, $N=566$, $p<0,01$. This finding suggests that individu who have higher Islamic religiosity will also have higher readiness for marriage.
