## **Abstrak**

### **<b>ABSTRAK</b><br>**

Penelitian ini melihat hubungan antara citra tubuh dan sikap menerima terhadap bedah kosmetik pada remaja perempuan. Citra tubuh ditunjukkan dengan adanya lima dimensi, yaitu appearance evaluation, appearance orientation, body area satisfaction, overweight preoccupation, dan self-classified weights. Penelitian ini menggunakan alat ukur Multidimensional Body Self Relation Questionnaire-Appearance Scales (MBSRQ-AS) yang telah diadaptasi oleh Raisa Andea (2010) untuk mengukur citra tubuh. Lebih lanjut, sikap menerima terhadap bedah kosmetik ditunjukkan dengan adanya tiga dimensi, yaitu intrapersonal, social, dan consideration. Penelitian ini menggunakan alat ukur Acceptance of Cosmetic Surgery (ACSS) dikembangkan oleh Henderson-King dan Henderson-King (2005). Teknik statistik yang digunakan dalam penelitian ini adalah Pearson Product Moment Correlation. Penelitian ini melibatkan 50 responden remaja perempuan di usia akhir dengan usia 18-24 tahun. Hasil penelitian ini menunjukkan bahwa tidak terdapat hubungan yang signifikan antara citra tubuh dan sikap menerima terhadap bedah kosmetik pada remaja perempuan ( $r = 0,19$ ,  $p>0,05$ , two-tailed).

Kata kunci: citra tubuh; remaja perempuan; sikap menerima terhadap bedah kosmetik
