Abstrak

ABSTRAK

Penelitian ini bertujuan untuk menganalisis gejala overreaction pada 113 saham perusahaan manufaktur di Bursa Efek Indonesia selama periode 2008-2014. Metode yang digunakan adalah model market adjusted return yang memberikan perbandingan antara portofolio saham winner dan saham loser dan metode event windows. Periode penelitian yang dibagi menjadi 6 replikasi dengan periode formasi dan periode observasi di dalamnya. Periode penelitian juga dibagi kedalam 3 event. Penelitian ini menemukan beberapa gejala overreaction, tetapi secara statistik tidak ditemukan adanya gejala overreaction, baik untuk observasi secara keseluruhan pada saham manufaktur tanpa terdapat political event di dalamnya, maupun terdapat political event di dalamnya. Hasil penelitian menunjukkan bahwa saham industri manufaktur tidak terjadi gejala overreaction pada 6 replikasi, sedangkan pada event windows ditemukan gejala overreaction pada event ketiga. Reshuffle kabinet yang terdapat pada event ketiga telah menunjukkan terjadinya gejala overreaction dalam saham manufaktur.
