Abstrak

ABSTRAK

Anak terdiagnosa kanker umumnya mengalami pengobatan yang mempengaruhi kondisi emosional, kualitas hidup dan kesejahteraan spiritual pada anak juga orangtua. Penelitian bertujuan mengetahui hubungan kesejahteraan spiritual orang tua terhadap kesejahteraan spiritual dan kualitas hidup anak yang mengalami kanker. Desain penelitian cross sectional pada 81 pasang orang tua anak dengan teknik consecutive sampling. Data dianalisis secara bivariat multivariat menggunakan regresi linier. Hasil penelitian menunjukkan hubungan bermakna, arah kekuatan sedang dan positif antara kesejahteraan spiritual orang tua dengan kesejahteraan spiritual anak ($r: 0,324$; $Pvalue: 0,003$) dan hubungan antara kesejahteraan spiritual anak dengan kualitas hidup anak ($r: 0,324$; $Pvalue: 0,003$), serta hubungan bermakna, kekuatan lemah dan positif antara kesejahteraan spiritual orang tua dengan kualitas hidup anak ($r: 0,263$ $Pvalue: 0,018$). Peneliti merekomendasikan perawat mengidentifikasi dan asuhan keperawatan spiritual perlu ditingkatkan pada anak yang mengalami kanker dan keluarganya

ABSTRACT

Children diagnosed cancer generally undergo treatments affected emotional state, quality of life and spiritual well-being. This study aims to determine relationship of parents spiritual well being against the childrens spiritual well-being and quality of life who have cancer. Cross-sectional study design in 81 pairs of parents-children taken with consecutive sampling. Data analyzed using bivariate multivariate linear regression. The results showed significant correlation with direction and strength of relationship was positive between parent spiritual well-being with children spiritual well-being ($r: 0.324$ $Pvalue: 0.003$) and between childrens spiritual well being with children quality of life ($r: 0,356$; $Pvalue; 0,001$) significant correlation with direction and strength of weak positive correlation between parents spiritual well-being with childrensquality of life ($r: 0.263$ $Pvalue: 0.018$). Researchers recommend the nurse to identify and carry out spiritual well being care for children and parent with cancer
