**ABSTRACT
**

Indonesia is designated by government to be the world's Moslem fashion center in

2020. To support the initiative, the researcher would like to contribute in adding insight on factors that influence intention to buy of moslem women clothing in Indonesia. One of the related factor is sub-cultur factor religiosity. Therefore, I conduct a research on the influence of religiosity of moslem women on consumer attitudes towards fashion and intention to buy of Moslem women clothing. The methodology used is quantitative descriptive through data analysis method by structural equation model tool. The expected result of the research is religiosity will have significant impact on consumer attitudes towards fashion and consumer attitudes towards fashion will have positive and significant impact on intention to buy for moslem women clothing
