Abstrak

Neonatus mengalami kondisi ketidaknyamanan selama mendapatkan perawatan di ruang intensif. Tujuan penulisan untuk menganalisis aplikasi teori Comfort Kolcaba pada bayi baru lahir dengan masalah kenyamanan dan pernapasan. Studi kasus dilakukan terhadap lima bayi di ruang perinatologi. Asuhan keperawatan berfokus pada kenyamanan fisik, psikospiritual, sosiokultural, dan lingkungan. Pengisapan lendir teknik empat tangan sebagai salah satu intervensi kenyamanan yang dievaluasi dengan Pediatric Comfort Assessment. Penerapan teori Comfort Kolcaba memberikan hasil yang baik terhadap kenyamanan kelima bayi. Kenyamanan psikospiritual dan sosiokultural dapat terpenuhi; sedangkan kenyamanan fisik dipengaruhi oleh berbagai faktor. Simpulan dari studi ini yaitu teori keperawatan Comfort Kolcaba sangat komprehensif sehingga sangat direkomendasikan untuk diterapkan pada bayi secara simultan dan berkesinambungan.
