

Needs assessment for e-learning: training technology

Chapnick, Samantha, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20435444&lokasi=lokal>

Abstrak

A needs assessment must address the high-level goals of the organization, point to the right intervention that meets the needs of all stakeholders, and set up a path for the new intervention. This issue offers a step-by-step guide for an expanded needs assessment process that will serve the organizations goals of working to implement e-learning programs. Useful sidebars include information on determining stakeholders and the stakeholder assessment process.
