

Changing hospital architecture

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20436441&lokasi=lokal>

Abstrak

What can good design offer the hospital, a functionally distinct building type showing considerable consistency of component parts and key issues around the world? Few well-known architects have been involved in the design of hospitals and even fewer big architectural awards have been won. And yet in almost no other building type are the consequences of getting the design wrong quite so serious.
