

Ozonation process to enhance biodegradability of petroleum waste by *Pseudomonas aeruginosa* bacteria in mineral salt medium

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20437723&lokasi=lokal>

Abstrak

Contamination of petroleum waste has endangered the environment yet its processing technology is not effective and efficient. It is because that by petroleum waste is difficult to be degraded by bacteria due to many complex bonding compounds contained in this oil water.
