

Psychological research, practice, and social policy: Potential pathways of influence

Maton, Kenneth I., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20437778&lokasi=lokal>

Abstrak

Greater use of psychological research and practice knowledge in the formulation of social policy is necessary to enhance the well-being of U.S citizens and communities. Although historically there are instances in which psychological and social science research and practice have had a substantial influence on federal policy.
