

Organic architecture : creativity searching of architecture in the 21st century

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20438940&lokasi=lokal>

Abstrak

Rationalist way of architecture design has been a mainstream in the modern architecture, especially along the industrial era of 20th century. This way has separated architecture, especially building from nature, e.g: rectangular is not close to nature behaviour. So looking back to nature is the main trend of post-industrial age of creativity searching of architecture. The future is for organic architecture.
