**Abstrak**

Perilaku aman seseorang didasarkan pada persepsinya terhadap risiko keselamatan kerja. Maka perlu dilakukan penelitian untuk mengetahui faktor yang mempengaruhi persepsi risiko keselamatan kerja di PT Medco E&P Indonesia Rimau Asset, variabel yang diteliti berupa pengetahuan, keterampilan, motivasi, dan pengalaman.

Penelitian ini menggunakan metode survai dengan pendekatan cross sectional menggunakan kuesioner, wawancara terstruktur, dan observasi. Analisis univariat menunjukkan pengetahuan, keterampilan, dan persepsi pekerja tergolong kurang baik, motivasi pekerja berimbang, dan sebagian besar pekerja mempunyai pengalaman 5 tahun. Analisis bivariat menunjukkan pengetahuan, keterampilan, dan motivasi mempunyai hubungan yang bermakna dengan persepsi risiko keselamatan kerja.

<hr><i>Safe acts are based on someone's safety risk perception. So, it needs research to know the factors that influence the safety risk perception at PT Medco E&P Indonesia Rimau Asset, the variable being researched are knowledge, skill, motivation, and experience.

This research used survey method with cross sectional and using questionnaire, structured interview, and observation to get the data. Univariate analysis indicates that the workers have an adequate knowledge, skill, and perception, balance level of motivation, and majority experienced 5 years. Bivariate analysis indicates that knowledge, skill, and motivation have significant relation with safety risk perception.</i>
