

Econometric analysis

Greene, William H., 1951-, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20442290&lokasi=lokal>

Abstrak

Includes Classical, Bayesian, GMM, maximum likelihood, cross section, and more time series and panel data, covering applications and numerical examples. This book gives solutions to applications that show students how to do the computations. It gives attention to both linear and nonlinear techniques.
