

Heat treating: proceedings of the 23rd ASM heat treating society conference, September 25–28, 2005 David L. Lawrence convention center pittsburgh, pennsylvania USA

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20442601&lokasi=lokal>

Abstrak

Contents :

- Integrated Numerical Simulation and Process Optimization for Solutionizing of Aluminum Alloys
- A Diagnostic Tool for Gear or Gear-Like Object Hardening
- Basic Principles of Quench System Design For Induction Hardening
- Cladding With High Power Direct Diode Lasers vs. Cladding With Traditional Arc Welding Processes
- Controlling Induction Heating Magnetic Fields with Flux Field Concentrators
- Failure Analysis of Induction Coils
- How to Improve Inductor Life
- Layered Alloys for Effective Magnetic Flux Concentration in Induction Heating
- Rapid Tempering of Automotive Axle Shafts
- Relation Between the Mechanical Properties of the Steel Brazed Joints and its Filler Metal Elements and Surface Roughness of Base Metal
- Vacuum Brazing of CA6NM Components
- Using Natural Gas to Run an Electrical Generator for Induction Heating Forging
- A Novel System for Acquiring and Presenting Heat Treat Data
- Advances in Microelectronics Allowing for Increased Capability in Optical Temperature Measurement
- Atmosphere Sensors and Controls
- Cryogenic Quenching of Steel Revisited
- Current Status of the Cryogenic Treatment Industry A USA Market Survey
- Decarburisation; its Causes, Prevention, Detection and Correction
- Development Of A Mass Flow – Jet Impingement Furnace For The Solution Heat Treatment Of Aluminum Castings
- Furnace Surveying With ‘In-Process Survey Systems’ – the Experience So Far
- Mathematical Model for Continuous Annealing Stainless Steel Strips
- Nitro-carburizing and Nitriding Technology. The State and Development of Processing Technology
- Tempering Calculator
- The Wolfson Quenchant Cooling Curve Test - Don't jump out of the Frying Pan
- Vanadium Carbide Diffusion Coatings for Tool and Die Components
- Atmosphere Control in Heat Treatment for Creation of Quality and Value in Automotive Materials and Components

- Multiscale Heat Treat Simulation and Performance Modeling of Large Steel Components
- Non-toxic Alternatives to Dissociated Ammonia for Furnace Atmospheres
- Bending Fatigue Strength Improvement of Carburized Aerospace Gears
- Care and Maintenance of Quench Oils
- Deformation Forecasting During the Cooling of a Test Part
- Distortion Compensation by Means of Quenching in Flexible Jet Fields
- Effect of Carburization on the Residual Stress and Fatigue Life of a Transmission Shaft
- Effect of Intensive Quenching on Mechanical Properties of Carbon and Alloy Steels
- Effect of Quenching Variables on the Residual Stress and Distortion of a Heat Treated Disk
- Effect of Water on Quench Oil and Quenching
- Experiment and Simulation of Heat Treatment Results of C-Ring Test Specimen
- Explanation of the Origin of Distortion and Stress Distribution Patterns in Water-Quenched Chromium Steel Cylinders Using Computer Simulation
- Fluidized Bed Quenching: Reducing Residual Stresses and Distortion
- Optimizing Agitation and Quench Uniformity Using CFD
- Prediction of Residual Stress and Damage Distribution using Explicit Microstructure Level Simulation of Martensitic Transformation
- Reducing Dimensional Changes During Heat Treatment by Optimizing the Process with Particular Emphasis on Quenching Parameters
- The Effects of Surface Oxides on the Quenching Performance of AISI 4140 Steel in Commercial Mineral Oils
- The Heat Treatment and Quenching of Gears
- The Influence of Flowrate and Deflector Arrangement on Distortion in Agitated Quench Tanks
- Efficient Numerical Simulation Techniques for High Pressure Gas Quenching
- Hydrogen Versus Helium: A comparative Study In High Pressure Gas Cooling Rates
- Analysis of Interdiffusion in Selected High Temperature Alloy Systems
- Effect of Intensive Quenching on Residual Stress
- Embrittlement Caused by Galvanic Reaction on Ductile Iron
- Estimating Heat Transfer Coefficients as a Function of Temperature by Data Mining
- Furnace Control Systems and Components to Improve Throughput and Reduce Cost
- Improvement of Mechanical Properties by High Temperature Solution Treatment in an Aluminum Casting Alloy
- Low-Temperature Heating Changes Properties of Welded Joints of Aluminum Alloy V92Zr
