

Aluminum alloy castings: properties, processes, and applications

Kaufman, J. Gilbert, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20442643&lokasi=lokal>

Abstrak

Contents :

- Chapter 1: Introduction
- Chapter 2: Aluminum casting alloys
- Chapter 3: Aluminum casting processes
- Chapter 4: The effects of microstructure on properties
- Chapter 5: The influence and control of porosity and inclusions in aluminum Castings
- Chapter 6: Hot isostatic processing
- Chapter 7: Heat treatment of aluminum castings
- Chapter 8: Properties and performance of aluminum castings
- Data Set 1: Aging response curves
- Data Set 2: Growth curves
- Data Set 3: Stress-strain curves
- Data Set 4: Tensile properties at high and low temperatures and at room Temperature after high-temperature exposure
- Data Set 5: Creep rupture properties
- Data Set 6: Rotating-beam reversed-bending fatigue curves
- Appendix 1: Glossary of terms
- Appendix 2: Abbreviations and symbols
- Appendix 3: Test specimen drawings
- Subject index
- Alloy index
