Abstrak

ABSTRAK

Isu lingkungan menjadi topik penting bagi masyarakat karena kehidupan masyarakat sendiri bergantung pada lingkungannya. Jurnalisme lingkungan yang membawa berita bencana, penting untuk disajikan secara informatif dan bertujuan untuk menanggulagi maupun menyelesaikan permasalahan yang ada. Penelitian di kedua jurnal yang membahas berita bencana kabut asap di surat kabar Riau Pos dan berita semburan lumpur Sidoarjo di surat kabar Jawa Pos telah membahas aspek jurnalisme lingkungan yang cukup lengkap. Namun, kedua penelitian menemukan masing-masing surat kabar harian belum secara komprehensif membahas aspek jurnalisme yang mengusut penyebab utama masalah dan bagaimana mengatasinya. Persamaan dari kedua penelitian terlihat dari pembahasan aspek jurnalisme melalui metode analisis teks. Pembahasan aspek jurnalisme lingkungan di surat kabar Riau Pos dan Jawa Pos dari kedua penelitian akan lebih lengkap lagi apabila melakukan wawancara yang menanyakan lebih mendalam tentang proses pembuatan berita dari redaksi atau jurnalis, dan juga tanggapan pembaca terhadap relevansi informasi yang ingin diketahui, serta penyajian berita lingkungannya.

ABSTRACT

Abstract Environmental issue become important topic for society because life of the society itself depends on its environment. Environmental journalism that brings news of disaster, is important to be presented informative and aims to tackle and solve existing problems. Research in both journals which discuss news of haze in Riau Pos newspaper and Sidoarjo mud flow news in Jawa Pos newspaper, had discussed quite complete environmental journalism aspect. However, both researchs found each daily newspaper has not been comprehensively discuss journalism aspect about investigation of problem 39 s main cause and how to solve it. Similarity of both research seen from discussion of journalism aspect through text analysis methods. Discussion of those environmental journalism aspects in Riau Pos newspaper and Jawa Pos newspaper from both research would be more comprehensive if there 39 s interview that asked more deeply about news making process from newsroom or editorial staff, and also reader 39 s response to relevance of information about what they want to know, as well as presentation of the environmental news. Keywords environmental journalism, environmental news, disaster, text analysis.
