Abstrak

**ABSTRAK
**

Makalah ini membahas pengaruh anonimitas terhadap cyberbullying di platform Social Media. Makalah ini merupakan tinjauan terhadap studi Barlett Gentile 2012 dan Hinduja Patchin 2006 mengenai korelasi antara cyberbullying dan anonimitas. Hasil peninjauan terhadap studi-studi tersebut menunjukkan bahwa anonimitas menyebabkan tingkat kecenderungan kita untuk berpikir sebelum bertindak di dunia online, dan menunjukkan efek cyberbullying yang bergantung pada pengetahuan korban atas identitas pelaku.

**ABSTRACT
**

The focus of this paper is the effect of anonymity on cyberbullying, in relation to Social Media platforms. This paper will review and analyse past studies of Barlett Gentile 2012 and Hinduja Patchin 2006 on the correlation between cyberbullying and anonymity. The results of the reviewed studies indicated that anonymity effects the tendency to reflect on our actions, and that the effects of the cyberbullying depends on whether the victim knows the perpetrator.
