

Weak convergence of measures : applications in probability

Billingsley, Patrick, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20450684&lokasi=lokal>

Abstrak

A treatment of the convergence of probability measures from the foundations to applications in limit theory for dependent random variables. Mapping theorems are proved via Skorokhod's representation theorem; Prokhorov's theorem is proved by construction of a content. The limit theorems at the conclusion are proved under a new set of conditions that apply fairly broadly, but at the same time make possible relatively simple proofs.
