

Multilevel projection methods for partial differential equations

McCormick, Stephen F., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20451157&lokasi=lokal>

Abstrak

The multilevel projection method is a new formalism that provides a framework for the development of multilevel algorithms in a very general setting. This methodology guides the choices of all the major multilevel processes, including relaxation and coarsening, and it applies directly to global or locally-refined discretizations.
