Abstrak

Cultural heritage professionals museum curators, museum professionals, archivists and librarians work with their specialized knowledge to prioritize the needs of their collections. Preservation managers draw on experts in climate control, fire safety, pest management and more in developing the large overview of a collection and its needs. And all the special materials within the collections have their experts too. Here, in one volume, The Preservation Management Handbook offers a wide range of topic-specific expertise that comprises both an enduring text for preservation students as well as an essential one-stop reference for cultural heritage professionals particularly those in small- to medium sized organizations where resources are limited and professional help not always at hand.
