

SMST-2000: proceedings of the international conference on shape memory and superelastic technologies

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20451980&lokasi=lokal>

Abstrak

The SMST Conferences are a series of shape memory industry conferences focusing on real-world issues and applications of shape memory materials. Each volume of the proceedings contains over 100 technical papers and is an excellent reference on the current state-of-the-art in the shape memory and superelastic industry. Topics covered include medical and dental applications, biocompatibility, corrosion, actuators, connectors, alloy processing, manufacturing issues, laser processing, design, finite element analysis, and shape memory thin films.
