

Metode pemahaman bagi penelitian antropologi

Ninuk Irawati Kleden Probonegoro, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20452294&lokasi=lokal>

Abstrak

Amidst the many changes in the approaches taken by anthropologists today, the author re-examines the works produced in the more humanistic tradition of anthropology. She begins with the question of whether anthropological research can be conducted with an idiographic approach. Through a discussion of Verstehen, experience and hermeneutics, and drawing from her own experiences in the field, the author argues that the methods characteristic of a more humanistic anthropology can be applied to anthropological research and remain scientifically sound.
