

Electric railways 1880-1990

Duffy, Michael C., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20452586&lokasi=lokal>

Abstrak

This book presents a thorough survey of electric railway development from the earliest days of the London Underground to modern electrified main line trains. Coverage includes chapters on signalling and communications, power supplies, and a detailed survey about traction systems, both AC and DC. The introduction, first of mercury arc rectifiers, and later of power semiconductor controls, is also discussed in detail.
