

Intellectual property rights for engineers

Irish, Vivien, 1942- , author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20452600&lokasi=lokal>

Abstrak

Chapters outline the basic rights through automatic protection (copyright, design right) and registration systems (patent, registered design, trade mark), as well as confidential information. Irish then covers precisely who owns the rights and how their use is constrained by EC law, how to license or even litigate when necessary and, finally, strategic aspects for decision-making and management.
