Abstrak

Penelitian ini mendeskripsikan tentang mekanisme pencegahan kejahatan yang diterapkan oleh Pertamina EP dalam mencegah terjadinya penambangan minyak tanpa izin ilegal di Wonocolo Field CEPU PT Pertamina EP. Penelitian ini adalah penelitian kualitatif dengan desain analisis deskriptif. Peneliti mencoba melihat faktor-faktor penyebab terjadinya penambangan minyak ilegal kejahatan melalui teori Broken Windows dan konsep pencegahan kejahatan situasional. Permasalahan munculnya penambangan minyak tanpa izin ilegal di Wonocolo bukan hanya didasari kelalaian atau pengabaian pengamanan yang dilakukan perusahaan namun juga keterlibatan Occupational Crime baik dari pegawai, muspika dan muspida yang turut mendukung aktivitas tersebut. Occupational Crime ini juga melemahkan upaya-upaya yang telah dilakukan perusahaan dalam menangani masalah penambangan minyak tanpa izin ilegal.

.....

This research describes crime prevention mechanism implemented by Pertamina EP in order to prevent unlicensed illegal oil mining in Wonocolo Field CEPU PT Pertamina EP. This is a qualitative research with descriptive analytical design. The author tries to identify the factors that precipitated illegal oil mining crime using Broken Windows Theory and Situational Crime Prevention concept. The unlicensed illegal oil mining in Wonocolo not only caused by the absence or ignorance of guardianship by the company, but also the occurrence of occupational crime involving the employees, Muspika, and Muspida that also supports that activity. This occupational crime also weakened the efforts that have been made to deal with unlicensed illegal oil mining.
