Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20458496&lokasi=lokal>

Abstrak

Tingkat pengetahuan dan sikap Perawat dalam komunikasi terapeutik sangatlah penting untuk menunjang keberhasilan pemberian asuhan keperawatan. Bertujuan untuk mengetahui hubungan antara tingkat pengetahuan dan sikap perawat dalam melakukan komunikasi terapeutik. Penelitian ini menggunakan desain cross sectional, sample sebanyak 92 orang perawat, teknik pengambilan data secara simple random sampling. Hasil penelitian menunjukkan bahwa tidak terdapat hubungan yang bermakna antara tingkat pengetahuan dan sikap dalam berkomunikasi terapeutik pada perawat di RS Fatmawati Jakarta tahun 2016 p value = 0,248. Hasil penelitian diharapkan menjadi bahan pertimbangan agar perawat diberikan pelatihan komunikasi dan sikap dalam berkomunikasi terapeutik, serta penelitian selanjutnya bisa meneliti apa yang belum diteliti dalam komunikasi terapeutik.

.....The level of knowledge and attitude of Nurse in therapeutic communication is very important to support the success of nursing care. Aims to determine the relationship between the level of knowledge and attitude of nurses in conducting therapeutic communication. This research used cross sectional design, 92 samples of nurses, and simple random sampling technique.

The results showed that there was no significant relationship between the level of knowledge and attitude in communicating therapeutic at nurses at Fatmawati Hospital Jakarta 2016 p value 0,248.

The results of the study are expected to be considered for nurses to be given communication training and attitude in therapeutic communication, and further research can examine what has not been investigated in terms of therapeutic communication.
