ABSTRACT

This thesis discusses the role of panopticism model of Press Council in social control of crime in cyber media and the self regulation process of cyber media. Through field research method, the researcher tried to explain the panopticism model formed on the relationship between Press Council, Press Association AMSI and AJI and Elements of society in controlling crime news in cyber media. The results show four characteristics of panopticism possessed by the Press Council, AMSI, AJI and the elements of society that plays a role on the formation of self regulation in Indonesias 39 cyber media.
