

Planning for sustainability : creating livable, equitable and ecological communities

Wheeler, Stephen, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20464738&lokasi=lokal>

Abstrak

This book presents a wide-ranging, intellectually well-grounded and accessible introduction to the concept of planning for more sustainable and livable communities. By considering in turn each scale of planning--international, national, regional, municipal, neighborhood, and site and building--the book illustrates how sustainability initiatives at different levels can interrelate
