Abstrak

ABSTRAK
Penelitian ini bertujuan untuk melihat hubungan antara dukungan orang tua dan motivasi berprestasi pada remaja yang berasal dari keluarga miskin. Dukungan orang tua dibedakan menjadi hubungan antara ayah dan ibu, sedangkan motivasi berprestasi dibedakan sesuai dengan dimensinya yaitu, hope for success dan fear of failure. Studi dilakukan dengan menggunakan sampel sebanyak 105 remaja 47 laki-laki dan 58 perempuan dengan usia terbanyak partisipan 14 tahun 76 .. Dukungan orang tua diukur dengan Children 's Report of Parental Behavior CRPBI dan motivasi berprestasi diukur dengan Achievement Motivation Scale Revised AMS-R yang memiliki dua dimensi: hope for success dan fear of failure. Hasil analisis data menggunakan Pearson 's Correlation menunjukkan terdapat hubungan antara dukungan orang tua dengan motivasi berprestasi $r = 0.270$; $p < 0.01$ untuk dimensi hope for success, sedangkan untuk dimensi fear of failure terdapat hubungan $r = -0.217$; $p < 0.05$. Hasil penelitian ini dapat dimanfaatkan untuk melakukan program intervensi terkait pengembangan motivasi berprestasi pada remaja melalui pemberian dukungan yang tepat bagi remaja.

ABSTRACT
The aim of this study is to look for a relationship between parental support and achievement motivation among adolescents from poor family. Parental support is differentiated into support from father and from mother, while achievement motivation is differentiated according to its dimensions, hope for success and fear of failure. Participants were 105 adolescents 47 males, and 58 females with the majority of the participants age is 14 years old 76 from the total participant . Parental support was measured using Children 's Report of Parental Behavior while achievement motivation was measured using Achievement Motivation Scale Revised AMS R which has two dimensions hope for success and fear of failure. Results from Pearson 's Correlation show that there is a significant relationship between parental support and achievement motivation with $r = 0.270$ $p < 0.01$ for hope for success dimension and $r = -0.217$ $p < 0.05$ for fear of failure dimension. Findings from this study can be used to conduct an intervention program for adolescents to develop their achievement motivation through a right kind of support to build their achievement motivation.
