ABSTRAK

Analisis Praktik Residensi Keperawatan Medikal Bedah pada Kanker Lambung dengan Pendekatan Model Adaptasi Roy di Rumah Sakit Kanker Dharmais dan Cipto Mangunkusumo Jakarta Karya ilmiah ini bertujuan memberikan gambaran analisis praktik residensi Keperawatan Medikal Bedah selama 2 semester tentang penerapan teori model keperawatan dalam studi kasus, dan analisis hasil penerapan tindakan mandiri keperawatan berbasis pembuktian ilmiah (evidence based nursing practice), serta analisis hasil inovasi kelompok terhadap fenomena yang ditemui selama praktik residensi. Penerapan peran perawat profesional dalam proses asuhan keperawatan dengan menggunakan teori adaptasi Roy dilakukan pada kasus karsinoma nasofaring dan berbagai kasus keganasan lainnya terbukti bermanfaat membantu dan meningkatkan kemampuan adaptasi pasien terhadap stimulus internal dan eksternal yang dialami. Kegiatan aplikasi tindakan mandiri keperawatan berdasarkan pembuktian ilmiah pelaksanaan guided imagery dan progressive muscle relaxation bukti bermanfaat untuk mengurangi nyeri dan meningkatkan kualitas hidup pasien. Pada proyek inovasi manajemen nyeri pada pasien kanker yang menjalani kemoterapi di ruang rawat inap dengan memfasilitasi pembuatan multi media video guided imagery dan progressive muscle relaxation perawat dalam manajemen nyeri. Peran perawat profesional dapat dijalankan dalam setiap tahap kegiatan praktik residensi keperawatan medikal bedah peminatan onkologi secara holistik dan komprehensif meliputi upaya promotif, reventif, kuratif, dan rehabilitatif. Kata kunci: Adaptasi Roy, kanker, guided imagery dan progressive muscle relaxation, Manajemen nyeri.
