ABSTRACT

Politeness, speech act and discourse have become an interest area of language use in context. Attention has been drawn to the universality of politeness strategies across the culture. This study examines the nature of pattern of communication in terms of politeness, speech acts and discourse in sasak speech community. The subject of the studi is 1 Tuan Guru giving religious speech in silkur village. Participantobservaton is used as the method of data collection in this study. A video recording was used to collect data. Result of the study shows that reminding and sugesting are not acts of indicating or threatening addressees' negative face, but possitive strategies used to minimized the threat for addresses' possitive face and negative one as means of saving addressees' negative face. These three variables were interrealted to dechipper the nature of speech pattern of language use in the sasak speech community. the notion of face should be analyzed according to norms and cultural values such acts in different speech communities. Hence, the universality of communicative action and the type of speech act in a given speech community are crucial variable to sctinize the language use in context.
