Abstrak

ABSTRAK

Penelitian ini bertujuan melihat pengaruh koneksi politik jajaran direksi dan komisaris terhadap performa bank di Indonesia dalam kurun waktu 2007 ndash; 2017. Penelitian ini menggunakan data dari seluruh bank di Indonesia dengan melihat beberapa variabel dependen serta independen, seperti koneksi politik direksi dan komisaris, karakteristik direksi dan komisaris, serta karakteristik finansial bank tersebut. Penelitian dijalani dengan menggunakan dua variabel dependen dalam melihat performa bank, yaitu ROA dan Z-score. Kedua hasil penelitian menunjukkan bahwa koneksi positif menghasilkan performa yang baik dalam sebuah bank.

ABSTRACT

This research aims to see the connection between political connection of the board of directors and board of commissioners and bank performance in Indonesia from 2007 to 2017. Data used are from all banks in Indonesia with several dependent and independent variables, such as, board of directors and commissioners rsquo political connection, and characteristics, and also each bank rsquo s financial characteristics. We used two dependent variables to see the performance of all banks, which are, ROA and Z score. Both of the results showed that political connection of the board of directors and commissioners leads to a good performance in each banks.
