Title Factors Related To Physician Satisfaction Toward Incentive in sanjiwani gianyar hospital 2018.
Consellor Dr. drg. Mardiaty Nadjib, M.S
Introduction This research was aimed at analyzing factors which related with the satisfaction of doctors' incentive amount in Sanjiwani Hospital Gianyar.
Method The method used in this observational research was cross sectional, and the data was analyzed by using quantitative and qualitative approach. There were 75 quantitative respondents in this research. They are general practitioners and medical specialist who have met the inclusive criteria and received minimum three times doctor incentive. There were 11 informants in this research, namely, the Director of Sanjiwani Hospital, Service Director, General Vice Director, Financial vice Director, Head Departments, Service Team Leader, Head of Surgical Department, Head of Neurological Department, Head of Internal Department, and Head of Pediatric Department.
Results The elements of doctor's incentive which were analyzed in this research namely, the amount of doctor's incentive, the procedure distributing the doctor's incentive, the time to distribute the doctor's incentive, the appropriateness of doctor's incentive, and the comparison between the amount of doctor's incentive in Sanjiwani Hospital and the other hospitals. The result of this research shows that there is a correlation between the procedure of distributing doctor's incentive, communication and leadership with the satisfaction of doctor's incentive p
