Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20476627&lokasi=lokal>

Abstrak

Akreditasi Puskesmas merupakan upaya peningkatan mutu dan kinerja pelayanan Puskesmas sebagaimana tercantum dalam Permenkes Nomor 46 Tahun 2015. Dari 38 puskesmas di Kabupaten Brebes baru 10 puskesmas yang terakreditasi. Dasar pengajuan roadmap akreditasi puskesmas di Kabupaten Brebes hanya berdasarkan penunjukkan langsung, tanpa mengukur kesiapan puskesmas baik dari segi kelengkapan dokumen, penilaian assessment, serta ketersediaan sumber daya meliputi SDM, dana dan fasilitas sarana prasarana sesuai standar instrumen akreditasi puskesmas.

Tujuan penelitian ini adalah mengetahui kesiapan akreditasi puskesmas di Kabupaten Brebes ditinjau dari sisi input, proses dan output berdasarkan variabel sumber daya dan tahapan kesiapan prasurevei akreditasi. Penelitian kualitatif ini proses pengumpulan datanya dilakukan dengan wawancara mendalam dan telaah dokumen.

Hasil penelitian menunjukkan bahwa ketersediaan dana, sarana dan prasarana dinilai cukup siap untuk mendukung penilaian akreditasi puskesmas, namun hasil skoring assessment pada keterpenuhan kompetensi SDM dan kelengkapan dokumen masih rendah. Rekomendasi yang diajukan adalah memenuhi syarat pengembangan kompetensi SDM, dan melengkapi dokumen serta melakukan self assessment secara rutin dan terjadwal.

.....Accreditation of public health centers is an effort and performance enhancement public health centers services as listed in the Permenkes 46/2015. From 38 public health centers in Brebes District, just 10 public health centers are accredited. The basis of the filing of a roadmap of accreditation of public health centers in Brebes District only upon appointment directly, without measuring the readiness of public health centers both in terms of completeness, valuation assessment documents, as well as the availability of resources includes human resources, funds and facilities infrastructure standard instrument of accreditation of public health centers.

The purpose of this research is to know accreditation readiness of public health centers in Brebes District reviewed the input, process and output based on variable phase and readiness resources preaccreditation survey. Qualitative research is the process of collecting data using in-depth interviews conducted with the review document.

The results showed that the availability of funds and infrastructure are rated quite ready to support, but the public health centers accreditation assessment skoring assessment results on the fulfillment of human resource competency and the completeness of the documents is still low. A proposed recommendation is a qualified human resource competencies, and complete paperwork and do a self assessment regularly and scheduled.
