

The semantics of nouns

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20488244&lokasi=lokal>

Abstrak

This volume brings together the latest research on the semantics of nouns in both familiar and less well-documented languages, including English, Mandarin Chinese, Russian, the Papuan language Koromu, the Dravidian language Solega, and Pitjantjatjara/Yankunytjatjara from Australia. Chapters offer systematic and detailed analyses of scores of individual nouns across a range of conceptual domains, including 'people', 'places', and 'living things', with each analysis fully grounded in a unified methodological framework. They not only cover central theoretical issues specific to the analysis of the domain in question, but also empirically investigate the different types of meaning relations that hold between nouns, such as meronymy, hyponymy, taxonomy, and antonymy.
