ABSTRAK

Education can be done formally and non formally, with one container of religious values in society is assembly study of fiqh. Therefore, if a person participated the fiqh study, it is expected to increase his understanding of fiqh, especially muamalah fiqh, then the person will gradually realize that his wealth is actually Allah belonging and there is the poor's right inside that very wealth. The purpose of this research is to ascertain the influence of one education and the intensity of following the study of one fiqh on philanthropy practice. Population in this research is member of fiqh study at mosque of Darussalam, al Muslihun, and yasin tahlil Ibu Sulkhan counted 70 people, using total sampling method through questionnaire and processed by multiple regression. The results showed that the level of education and intensity influenced the practice of philanthropy. The level of formal education has a negative effect, while formal education and the intensity of following the study of fiqh has a positive effect on philanthropy.
