Abstrak

>*Storytelling* menjadi salah satu metode pengajaran yang dapat digunakan pada anak usia dini. Kegiatan *storytelling* dilakukan dengan dua cara yang berbeda yaitu, tanpa media gambar dan menggunakan media gambar. Penelitian ini bertujuan mengamati keefektifan metode*storytelling* dengan media gambar dibandingkan dengan *storytelling* tanpa media gambar. Penelitian ini melibatkan satu subjek penelitian yaitu anak usia dini (5 tahun) yang sudah pernah tinggal di Belanda selama satu tahun. Pengambilan data berasal dari hasil tes yang dilakukan sebanyak 8 kali terhadap subjek penelitian. Tes berupa *storytelling* tanpa media gambar dan dengan media gambar dilakukan secara bergantian. Pada pertemuan pertama dilakukan *storytelling* tanpa media gambar lalu dites dan pertemuan berikutnya *storytelling* dengan media gambar lalu dites, demikian selanjutnya. Hasil analisis data mengungkapkan bahwa *storytelling* dengan media gambar lebih efektif dibandingkan dengan *storytelling* tanpa media gambar dalam pengenalan kosakata bahasa Belanda.

Storytelling is one of the teaching methods that can be used in early childhood. Storytelling activities were carried out in two different ways, namely without and with picture media. This study aims to observe the effectiveness of the storytelling method with picture media compared to storytelling without picture media. This study was an experimental study which was involved by one research subject who has an early childhood background (5 years old) and has lived in the Netherlands for a year. Data retrieval derived from the results of tests conducted 8 times in 4 session to research subject. The tests in the form of storytelling without picture media and with picture media were carried out alternately. At the first meeting, was carried out storytelling without picture media then tested it and the second meeting was carried out storytelling with picture media then tested it, and so on. The results of data analysis revealed that storytelling with picture media proved more effective than storytelling without picture media in the introduction of Dutch vocabulary.
