**ABSTRAK
**

Apoteker memiliki peran yang penting di Apotek dan Rumah Sakit. Untuk menjalani praktik profesi, apoteker harus terlebih dahulu memenuhi standar kompetensi profesi. Terdapat 10 poin standar kompetensi apoteker Indonesia yang diharapkan menjadi kemampuan seorang apoteker saat lulus dan masuk ke dunia kerja untuk melaksanakan tugasnya. Praktik kerja profesi apoteker (PKPA) dilaksanakan di Apotek Kimia Farma No. 267. Bintaro dan Rumah Sakit Universitas Indonesia selama periode Bulan Februari-Mei 2020. Dengan adanya PKPA ini, diharapkan calon apoteker dapat menerapkan standar pelayanan kefarmasian di Apotek dan Rumah Sakit sesuai Peraturan Menteri Kesehatan No. 72 dan 73 tahun 2016 serta dapat menambah ilmu dan pengalaman untuk menghadapi dunia kerja.<hr />

**ABSTRACT
**

Pharmacists have an important role in community pharmacies and hospitals. To undergo professional practice, pharmacists must first meet professional competency standards. There are 10 standard competency points for Indonesian pharmacists that are expected to be the ability of a pharmacist when he graduates and enters the world of work to carry out his duties. The pharmacist professional work practice (PKPA) is carried out at Apotek Kimia Farma No. 267. Bintaro and Universitas Indonesia Hospital during the period February-May 2020. With this PKPA, it is hoped that prospective pharmacists can apply pharmaceutical service standards in pharmacies and hospitals in accordance with the Minister of Health Regulation No.72 and 73 of 2016 and can gain more knowledge and experience needed for work.
