

Noise control of the beginning and development dynamics of accidents

Aliev, Telman, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20509314&lokasi=lokal>

Abstrak

This book examines noise-monitoring technologies and tools for registering the threshold of development of the latent period of the transition of a facility or product into an emergency state and controlling the dynamics of this development. It also describes how the use of noise technology can improve the accuracy of the results of traditional methods employed in the analysis of noisy signals. Dr. Aliev analyzes the varieties and stages of the generation and development of defects preceding accidents of technical facilities and devices.
