Abstrak

Waste management is still a serious problem in Indonesia in the era of 4.0 as an example mushroomed cafe millennial culture coffee jaman now "PesenKopi" whose systems take away that now produces thousands of plastic cup plus yet the magnitude of public awareness of waste management both in the household and in the neighborhoods where they are, we humans have such enormous impact on the growth of the amount of garbage in the world and have an effect on the health of the earth.
